PROFESSIONAL SUMMARY

- Java Full Stack Developer with 3+ years of experience in designing, developing, and deploying scalable, high-performance web applications.
- Strong expertise in Java, Spring Boot, and Microservices architecture, with hands-on experience in building and integrating RESTful APIs
- Proficient in frontend technologies including Angular and Vue.js, delivering responsive and user-friendly interfaces.
- Experienced in working with SQL databases, writing optimized queries, and ensuring efficient data handling.
- Solid understanding of Software Development Life Cycle and hands-on experience in Agile methodologies.
- Skilled in implementing CI/CD pipelines and using version control systems such as Git and SVN.
- Demonstrated ability to develop secure, scalable, and maintainable applications, ensuring timely delivery aligned with business requirements.

TECHNICAL SKILLS

Programming Language	Java, SQL, JavaScript, HTML, CSS
Frameworks	Spring Boot, Spring MVC, Microservices, Struts
Frontend	Angular, JSP, Vue.js
Database	MySQL, PostgreSQL, Oracle
Version Control	Git, SVN
Servers	Tomcat
Tools	IntelliJ IDEA, Eclipse, VS Code, Postman, JUnit, Maven
Methodologies	Agile Scrum, CI/CD

PROFESSIONAL EXPERIENCE

Focus Softnet Private Limited, Hyderabad, India
July 2023 – Present

1. Project: TSRTC Cargo

TSRTC Cargo is a logistics and parcel management system designed to streamline parcel booking, tracking, and delivery operations. The application enables efficient handling of customer data, parcel workflows, and real-time tracking through a scalable web-based platform.

Role: Java Full Stack Developer

Technologies: Java, Spring Boot, Microservices, Angular, Spring MVC, Tomcat, Postman, Git
Responsibilities:

- Analyzed business requirements and developed scalable modules using Java, Spring Boot, and Microservices architecture.
- Designed and implemented RESTful APIs for parcel booking and tracking functionalities.
- Developed responsive UI components using Angular, HTML, CSS, and JavaScript.
- Implemented controllers, services, and business logic using Spring MVC to streamline workflows.
- Performed testing, debugging, and performance optimization to enhance application reliability.
- Utilized Git for version control, managing code changes and resolving issues efficiently.

2.Project: CRM Streamline Domain

CRM Streamline is a web-based customer relationship management system designed to manage real estate operations, customer interactions, and online payment processing. The application focuses on improving operational efficiency, data management, and user experience through a scalable and secure architecture.

Role: Java Full Stack Developer

Technologies: Java, Spring Boot, MySQL, (Vue.js (Vue 3)), Tomcat, JDBC, MVC2, SVN.
Responsibilities:

- Designed and developed the **CSC module using Spring MVC**, contributing significantly to project delivery.
- Built and integrated **service layer components** for real estate management and online payment systems.
- Developed dynamic UI components using **Vue.js**, improving user interaction and responsiveness.
- Performed **bug fixing and performance tuning**, enhancing system stability and reducing downtime.
- Applied **form validation and efficient backend logic** to improve application performance.
- Collaborated with cross-functional teams to ensure **timely delivery and seamless integration**.
- Managed code using **SVN**, maintaining version consistency and avoiding conflicts.

ACADEMIC PROFILE

- MBA Data science (2025) from KL University, Vijayawada - 85%
- Computer Science and Engineering (2022) from KL University, Vijayawada - 80%
